

# Technol 453 Winter Diesel Fuel Conditioner with Cold Flow

## Bulleted Highlights

- Eliminates fuel gelling and prevents ice formation
- Lowers fuel consumption by enhancing the combustion process
- Increases available horsepower and torque
- Lowers exhaust emissions and soot output
- Increases Cetane by up to 5 numbers
- Replaces fuel lubricity lost by the 15ppm sulfur mandate by up to 12½%
- Disperses and removes fuel tank sludge
- Cleans tanks, lines, filters, combustion chambers, and valves
- Controls water, inhibits corrosion and rust and minimizes microbial contamination
- Stabilizes fuel, preventing further sludge deposits
- Reduces deposits and carbon build-up
- Lowers engine and equipment maintenance costs and downtime

*Diesel Automobiles ▲ Diesel Boats ▲ Truck Fleets ▲ Diesel Generators*  
*EPA-approved for On-road and Off-road use*
