

Technol[®] STR-2+[®]
With an anti-oxidant
For Fuel Oil & Biofuel

Features & Benefits

- Maximizes Biodiesel Storage life, inhibiting decomposition, or oxidation, and maintaining fresh **Biofuel** during extended storage. Cost effective when compared to other stabilization alternatives. Particularly effective in biodiesel produced from sources with residual metal content. Effective in extending Rancimat values during extended storage
- Improves fuel combustion and efficiency
- Stabilizes fuel and prevents sludge formation
- Cleans the entire fuel system from tank to burner
- Reduces filter plugging and clogging
- Emulsifies and controls water, bacteria and algae
- Inhibits tank and fuel system corrosion
- Prevents fuel icing and gelling
- Reduces fuel-related equipment downtime and maintenance costs
